Source: A: You could try Nero Burning ROM. It's a different product to Nero DVD, but it should work with PowerPoint. ON-LINE POSITIVE AGEING (OP) is a new sensor chip for sensory analysis. The sensor chip can be used for biological samples such as living tissue, blood, urine, saliva etc. in combination with a temperature sensor. The sensor chip detects biotransformation processes of the sample in its environment in real time. Opposite to standard sensors, this sensor chip allows the assessment of more than one biotransformation process at the same time by point-of-care devices as well as in laboratories. Currently available in modules to measure the concentrations
