First off, at the time of this review, the description doesn't make it clear whether or not you can use these in commercial products (ie. If you can sell your game if it contains this music.)

From what I understand, this does come with Commercial Rights to the music for Visual Novel Maker and other RPG Maker engines from this company!

I'm creating an action-horror visual novel, and I can safely say this music is tight as HECK. Really neat tracks! Some are just cliché enough to be familiar, some are crazy and strange, but they're all perfect for a horror setting! The fact that I got commercial rights to the music is also so amazing, as it gives me the freedom to sell my game if I so pleased. Personally, I highly recommend this music pack.
